

Elite DCF42 Direct Vent Fireplace

Contemporary Gas Fireplace

If it is size and style you are looking for, then the Elite DCF42 is the fireplace for you!

Built to be the center piece of any stylish living room the DCF42 is a modern flush front clean face fireplace that is the cutting edge of style. At 42" in width it will stand out in any setting you put it in.

The DCF42 is 30,000 BTU's on high which means you will get an astonishing amount of heat from this unit when you want it. Not to mention creating at the same time a very impressive and aesthetically pleasing flame as well. But have no fear; for those milder evenings the DCF42 can turn down to a reasonable 22,000 BTU's on low for a more relaxed output.

The very original 7 pc designer log set is intended to maximize the space in such a large fireplace and at the same time offer a more modern and trendy look over and above your basic run of the mill log sets. The flame and the log set are meant to work hand in hand. Thanks to the oversized stainless steel pan burner in the DCF42, which creates a dominant flame, the designer log set and the flame are intertwined and work together to create a equality and harmony of visual pleasure.

QUALITY CRAFTSMANSHIP

Savannah's products are designed with superior components and materials, assembled by trained craftsmen who take great pride in their work. The burner and valve assembly are leak tested and test fired at a quality control test station. Once assembled the complete fireplace is thoroughly inspected by a qualified technician, before packaging, to ensure that you, the customer, receives the quality product that you expect from Savannah's.

Consult your owners manual for complete warranties and conditions and proper use and maintenance. Check all local and national building codes and fire regulations. All specifications are subject to change without prior written notice due to on-going product improvements. Clearances are in accordance with local installation codes and the requirements of the gas supplier.
